

# Vision

**To have an integrated Road Water management system for resilience in Uganda.**

# Ugandan Team

- Twinamastsiko Emmanuel - P. Olanya
- Kassozi Tendo - Osere Patrick
- Abal Peter - Godfrey O
- Jackson - Ivan E.
- Ruko Judith - William
- O. Jerosboam
- M. Charles
- Bogere Robert

# Activities

## Implementation

- Prepare a report and present it to the relevant authorities (Top management teams in relevant institutions)
- Formation of a coordination team
- Review the guideline to identify the clauses that allow for Road water management activities and existing gaps

# Capacity Building

- Needs assessment
- Capacity building plan
- Mainstreaming the plan into the various relevant sectors
- Partnership and technical assistance from development partners eg Meta-Meta, BU
- Stake holders trainings

# Projects on Ground

- Identify running projects in different sectors and incorporate road water management activities
- Monitor, evaluate and document the lesson learnt
- Upscaling the Road water management activities

# Steps by Organization

- MOLG
  - Prepare projects specific guidelines on RWM
  - Disseminate RWM concepts to stakeholders in the projects area including Political & Technical Leaders
  - Incorporate RWM in design and construction of market access Infrastructure
  - Form & train Road management Committees in RWM
  - Formalize the technical assistance agreement with Meta- Meta
  - To cascade Road water management to

- MOWT
  - Incorporate RWM structures during construction of roads
  - Review the guidelines to incorporate RWM activities
  - Capacity building of the technical staffs of Ministry staff & District Local government.
  - Community sensitization

- MWE
  - Capacity building in Watershed management
  - Provision of hydrological data where necessary
  - Technical support in construction water harvesting structures
  - Mainstreaming RWM activities into CMP

# MAAIF

- Technical support in construction of model irrigation structures
- Support in the formation of Water User Associations in the facilities
- Preparing plans for different SCM(Soil conservation measures)
- Support in the establishment of farm access roads and water harvesting structures

# BU

- Finalize the MOU with Meta-Meta
- Incorporate the concept of RWM into Research, teaching and outreach

# DLG

- Dissemination of the RWM concept to the stakeholders
- Capacity building of the stakeholders (WUA, Farmers etc)
- Incorporate the RWM concept into the District Development Plans
- Mobilization and sensitization of the community on the sustainable watershed management activities.

# Interim Coordination Committee(Team)

- MOW&T - Chair – Eng. Kabiiho W.
- MAAIF - Kasozi Tondo
- MWE - B. Robert
- MOLG – Eng. Obura G.
- University- D. Joseph
- DLG – Olal A.
- PRELNOR – Judith
- Enviromentalist – Charles Mutemo -
