

Green Roads for Water in UGANDA

Name and title of presenter:

GALIWANGO HILARY (Project Coordinator Uganda)

Date: 15th April 2020

Opportunities for GR4W in Uganda

What are the specific opportunities for GR4W in Uganda?

1. Working with government MDAs to aid revision of policies and attracting climate funding for adaptation of new technologies in the ROAD AND WATER SECTORS.
2. Working International Organizations and NGOs International Fertilizer Development Centre and The Danish Refugee Council.
3. There are opportunities to work with other partners on different projects including WATERPRENUER, and we are currently discussing opportunities for working together with USAID's **Feed the Future program**
4. University Research geared towards having more data recorded locally on impact of GR4W
5. Working with Farmer groups, women groups and youth groups.

Experience of GR4W from Uganda

What is the experience of Uganda?

Working with directly with roadside farmers and casual workers paid a small fee to do work. This facilitates knowledge transfer and creates job opportunities for the youth.

What are the benefits of using GR4W in Uganda?

- # Roads become more secure and reliable
- # Reduce road induced flooding
- # Increasing moisture content in fields
- # Facilitate regreening of bare fields and growing of pastures

What are the lessons learned that can be shared with other countries?

- Where land is owned by individuals, always get consent in ink before installing structures with the community.
- Most sensitization is needed at the grass roots where implementation and impacts happen
- Decide together with communities which technologies they want to adopt

Experience of GR4W from Uganda

Ongoing activities on GR4W in Uganda

- Engagement with the private sector to implement interventions in selected locations and training of communities
- Review of Concept Note to the CGF
- Green Future Farming Programme with IKEA Foundation together with Rain and Justdiggitt
- Planning to work with the Waterpreneurs “Innovate for Water” Marketplace in Uganda as Co-designers of the event

Co-organizing the MARKETPLACE

INNOVATE
4 WATER

TAKING A STAKE IN THE GAME

Main partner	 Co-organizers	Co-creation of the forum, network reach, logistics and operations, budgeting, fundraising, communication
Enabling partners	 Co-designers	Co-design of thematic sessions, mobilization of merchants, moderation
	 Patrons	Moral support and endorsement from public authorities
