Best lessons and visioning

How can we reach a country wide
audience

How can we to promote and transfer the
approach?

Session 1: Visioning

each one working individually, then bring all the 'roads' on the wall and all papers with priority interventions in organized way

Session 1: Visioning

Instructions

Can you draw an ideal 'green' road?

- Use the coloured paper with the road section from left to right
- Draw an ideal Green Road for Water

What according to you are the three most promising green road for water intervention that were discussed in this training? Why? Use a blank coloured paper for each intervention

- 1.
- 2.
- 3.

Session 2: Dissemination (groups looking at recommended practice)

How to make sure Green Roads for Water is spread throughout Nepal?

- What are the priorities in promoting (areas, topics, groups?)
- How to reach out to other effectively?
- What to do?
- What is still missing?

Session 3: Preparing poster or flyer

- Make three groups
- Each group to select a different topic
- Each group to make jointly make a poster, flyer, clip or presentation on Green Roads for Water that can be used to introduce the topic to others (such as – other – municipalities)
